WORK EXPERIENCE

Mobile App Developer

Feb 2026 - Present

Pianalytix (Remote)

- Developed an AI-powered voice notes app using **React Native** and **Supabase**, with Deepgram (speech-to-text) and OpenRouter (AI processing).
- Integrated Sentry for error monitoring and PostHogs for performance tracking.
- Published VoicenotesLab on the App Store.

React Native Intern

Aug 2025 - Feb 2026

Scizers (Remote)

- Developed cross-platform mobile applications using **React Native**, maintaining high code reusability between iOS and Android.
- Building modular and reusable UI components and converting Figma designs into responsive mobile interfaces in collaboration with designers and senior developers.
- Integrating **REST APIs** using Axios to fetch and display data efficiently in the mobile application.

PROJECTS

CampusOlx

Built a React Native (Expo) app with real-time messaging, role-based authentication (admin/user), and secure JWT token handling, integrating backend REST APIs using Axios.

TheInterviewroom.in

Built and deployed a high-traffic platform using Next.js, reaching 5K+ visitors and 15K+ views monthly. Integrated AI-powered post generation using Google Gemini and Groq APIs, with a modern UI and seamless deployment on Vercel.
